

Abstract

The MF96, in order to work in a LONWORKS net, must be equipped with the IF96009 module.

The physical LONWORKS interface available is the FTT10. No other media is supported.

On the backside of the module the service led and the service pin are located.

Interoperability

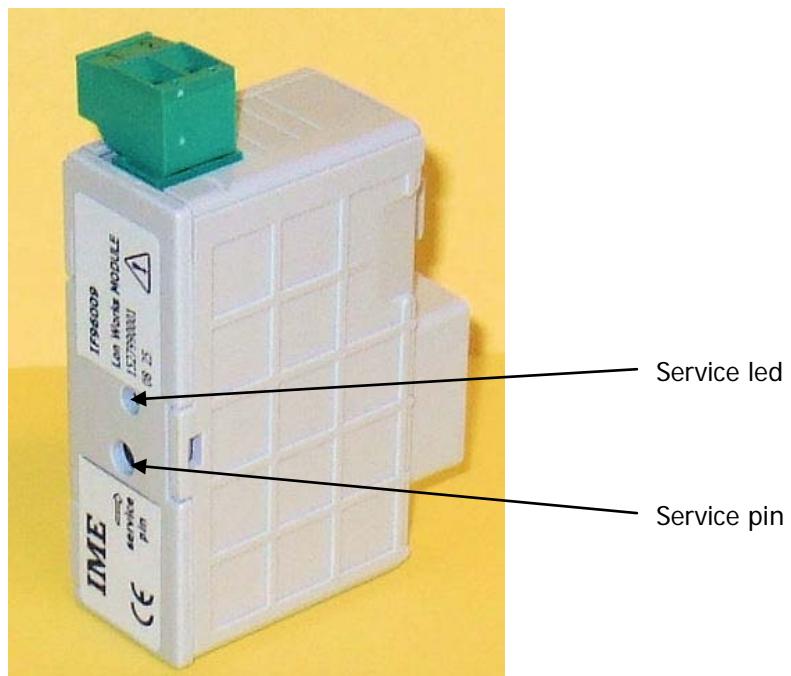

The MF96 is interoperable with all other devices in open LONWORKS networks.

It communicates within the LonWorks network at a rate of 78 kB via an FTT-10A Free Topology Transceiver which provides galvanic isolation. The bus wiring is insensitive to polarity.

Devices equipped with this transceiver can be wired in daisy chain, star, loop or any combination thereof as long as the maximum wire length requirements are met. The recommended configuration is a daisy chain with two termination modules which allows for maximum bus length and has the highest communication reliability in particularly when adding on to an existing bus.

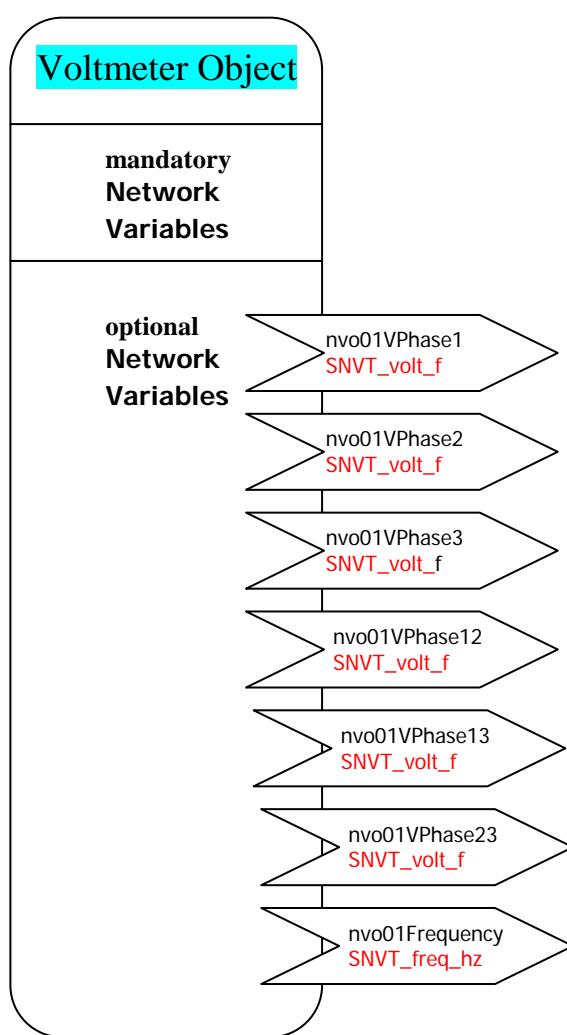

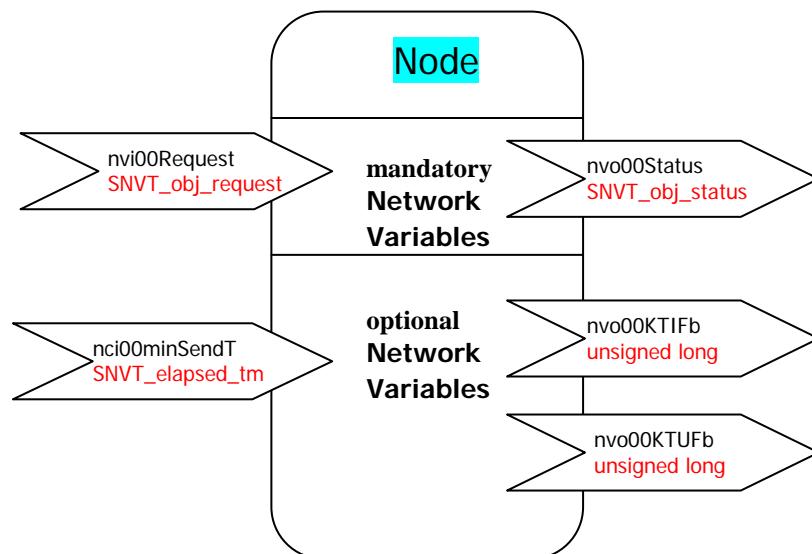

For more information refer to <http://www.echelon.com>

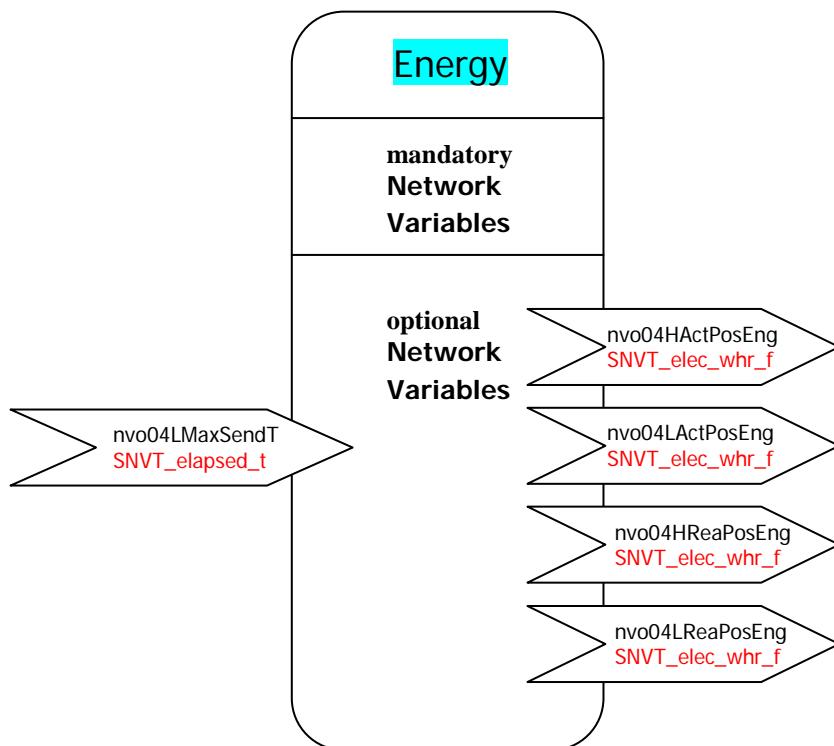

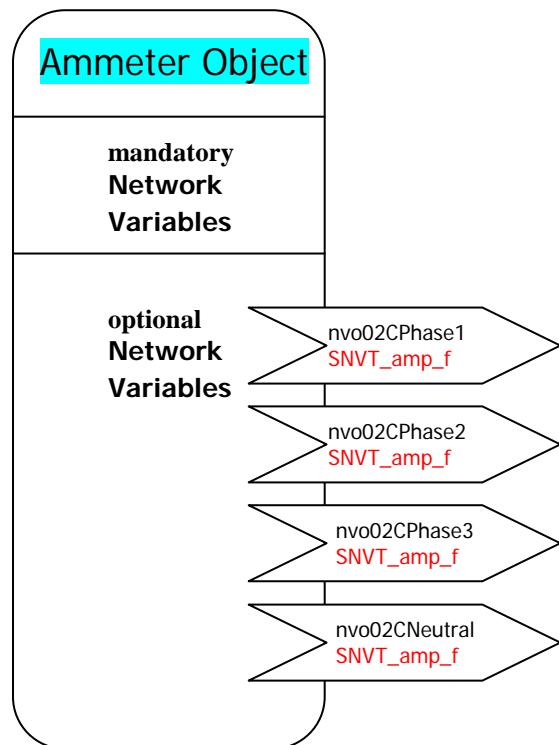

Configuration of MF96 and binding may be done using any LNS tool (e.g. Lonmaker for Windows TM)

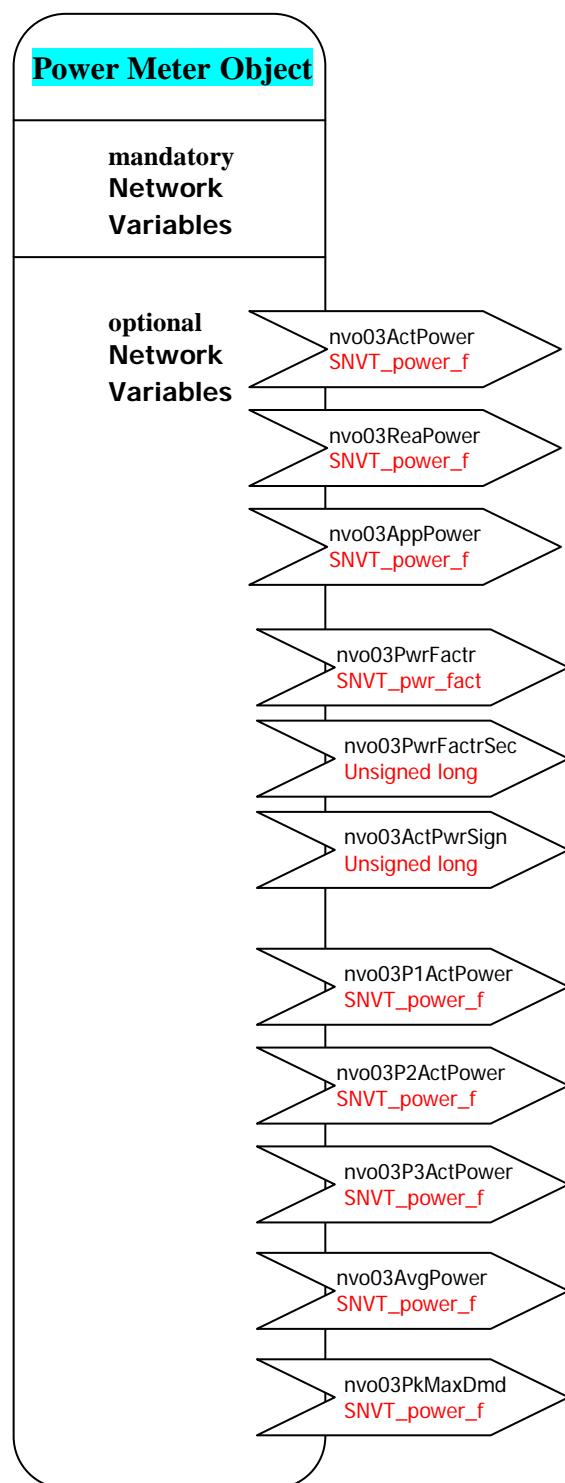

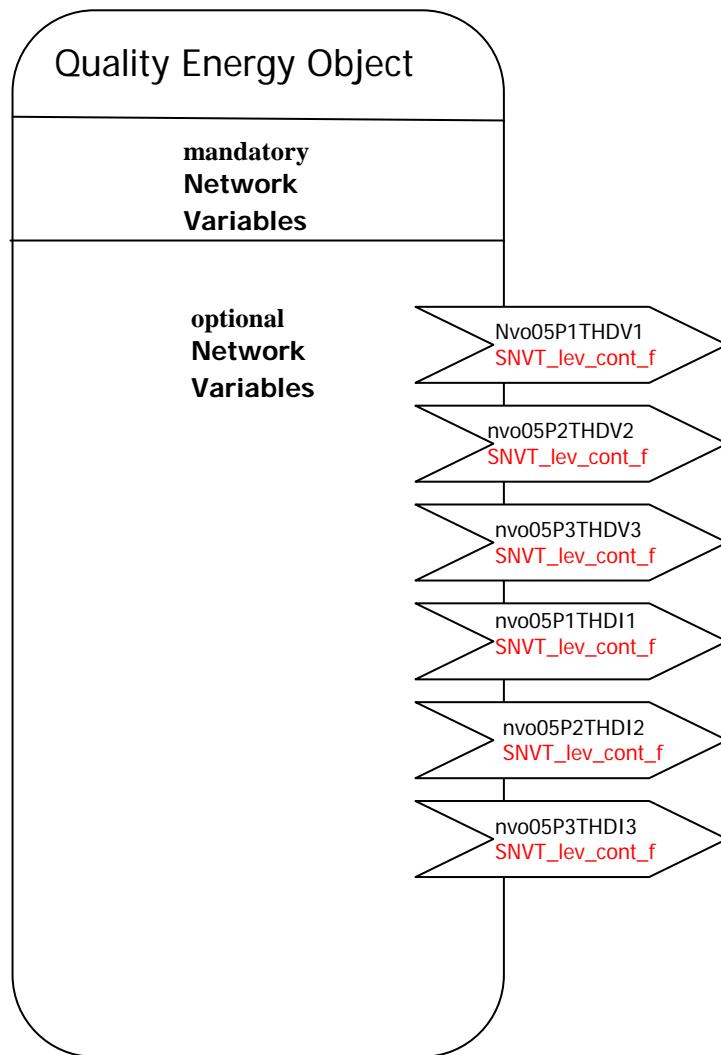

The service pin must be pressed during commissioning when required by the LNS tool.

The service led, after programming, must be off. At start-up time, only a pulse for a short while must be visible.

Program ID: 90:00:00:14:00:04:04:03

NETWORK VARIABLES

ID	Variable name	Variable type	Description	Engineering unit and max resolution
OBJECT 0				
1	nvi00Request	SNVT_obj_request	Object Request	
2	nvo00Status	SNVT_obj_status	Object Status	
3	nci00minSendT	SNVT_elapsed_tm	Min send time between two consecutive transmissions due to variation of any variable	0.0.0.0.0 (d.h.m.s.ms) d = 0 always h < 17
4	nvo00KTI_Fb	unsigned long	KTI: Current T. ratio	primary / secondary
5	nvo00KTU_Fb	unsigned long	KTU: Voltage T. ratio	primary / secondary multiplied by 10
6	nvo00KTI	unsigned long	KTI: C.T. ratio	Not active
7	nvo00KTU	unsigned long	KTU: V.T. ratio	Not active
8	nvo00ImpFactorFb	unsigned long	Not active	Not active
9	nvi00ImpFactor	unsigned long	Not active	Not active
VOLTMETER OBJECT				
1	nvo01VPhase1	SNVT_volt_f	Phase 1 voltage	volt.d
2	nvo01VPhase2	SNVT_volt_f	Phase 2 voltage	volt.d
3	nvo01VPhase3	SNVT_volt_f	Phase 3 voltage	volt.d
4	nvo01VPhase12	SNVT_volt_f	Phase 12 voltage	volt.d
5	nvo01VPhase23	SNVT_volt_f	Phase 23 voltage	volt.d
6	nvo01VPhase13	SNVT_volt_f	Phase 13 voltage	volt.d
7	nvo01Frequency	SNVT_freq_hz	Frequency	Hz.d
AMMETER OBJECT				
1	nvo02CPhase1	SNVT_amp_f	Phase 1 current	A.ddd
2	nvo02CPhase2	SNVT_amp_f	Phase 2 current	A.ddd
3	nvo02CPhase3	SNVT_amp_f	Phase 3 current	A.ddd
4	nvo02CNeutral	SNVT_amp_f	Neutral current	A.ddd
POWER METER OBJECT				
1	nvo03ActPower	SNVT_power_f	Active power	W
2	nvo03ReaPower	SNVT_power_f	Reactive power	var
3	nvo03AppPower	SNVT_power_f	Apparent power	VA
4	nvo03PwrFactr	SNVT_pwr_fact	Power factor	0..dd or 1.00
5	nvo03PwrFactrSec	Unsigned long	Power Factor Sector	0 or 1 or 2
6	nvo03ActPowerSign	Unsigned long	Active Power Sign	0 or 1
7	nvo03P1ActPower	SNVT_power_f	Phase 1 Active Power	W
8	nvo03P2ActPower	SNVT_power_f	Phase 2 Active Power	W
9	nvo03P3ActPower	SNVT_power_f	Phase 3 Active Power	W
10	nvo03AvgPower	SNVT_power_f	Average power	W / var / VA
11	nvo03PkMaxDmd	SNVT_power_f	Peak Maximum Demand	W / var / VA
ENERGY METER OBJECT				
1	nvo04HActPosEng	SNVT_elec_whr_f	Active Energy - High	MWh
